

STT – Scan to Tell

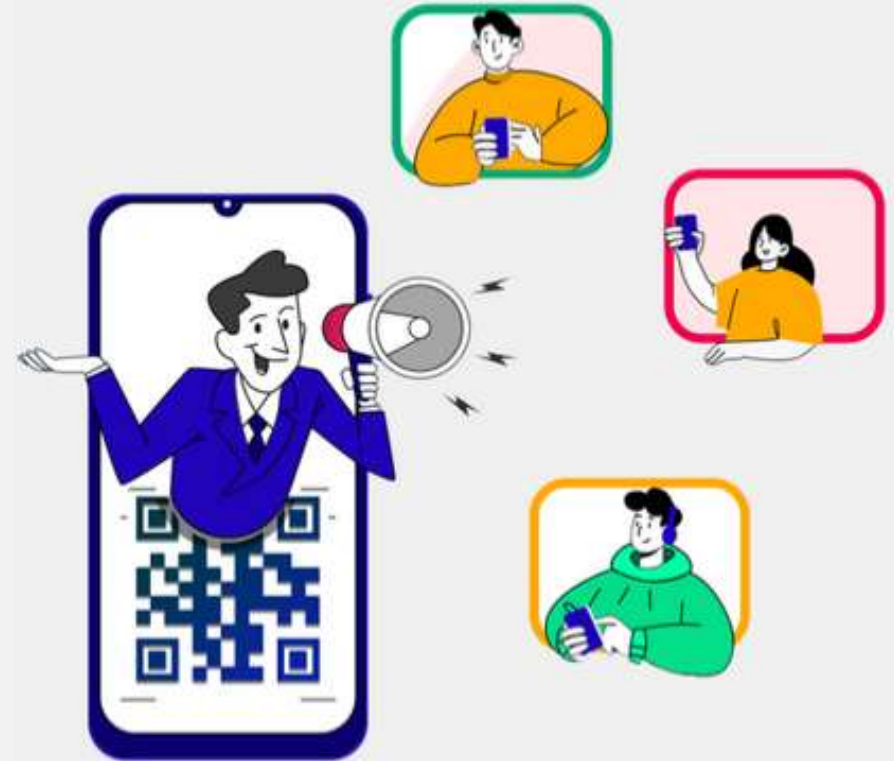

www.qrcode-stt.com

Taking the QR Code generation and your business to NEXT level

Product story telling

Every product
has story to tell

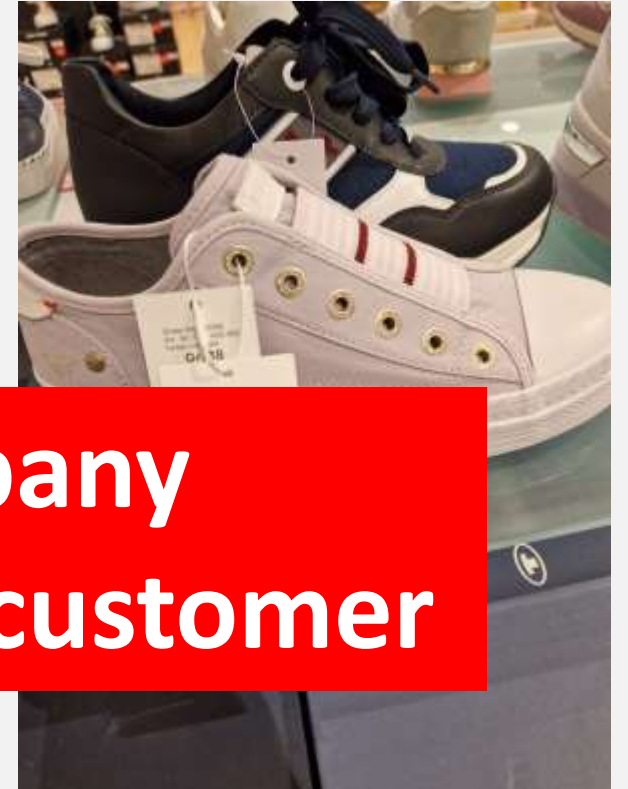

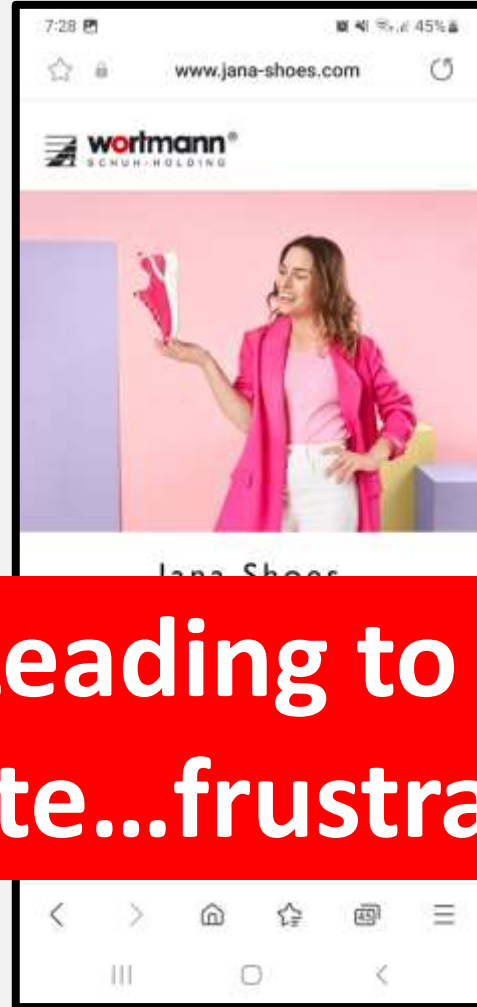

Present market situation with QR Code

- Normally web address replacement
- One entity at one time
- First have to have the URL
- Keep the website all the time live
- No customer connectivity
- Not so dynamic
- Not strong control on the content

Shoes

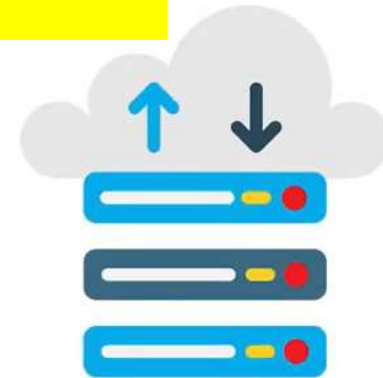

Leading to simple company website...frustrating for the customer

Digitalization of physical stuff

Biggest Hurdle

Live web URL

STT

Dynamic QR Code generator

All of your URLs, videos, images, files, Texts, certificates

Everything and any thing you want

Just in ONE QR CODE

WITHOUT any live URL, domain or hosting

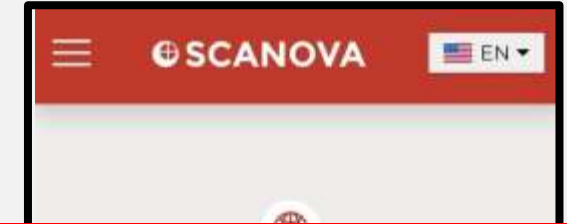

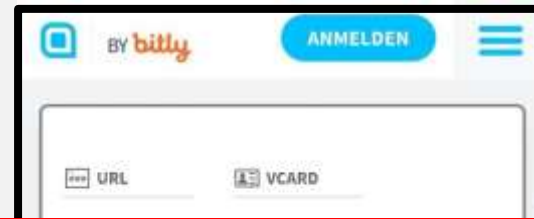

Textiles

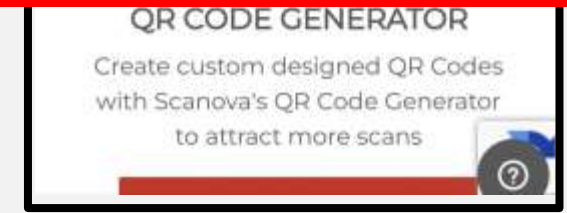

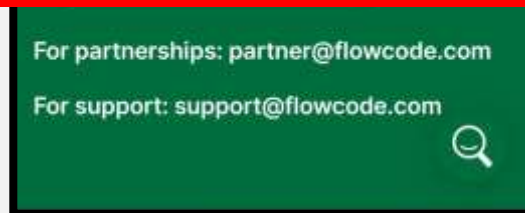

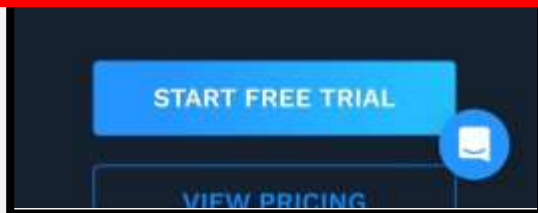

The image shows a mobile application interface for a product page. At the top, it says "Scan To Tell" and has the "STT" logo. The main content is a photograph of a women's shirt with a colorful, abstract pattern in shades of purple, blue, and pink. Below the image are three small dots, with the first one being blue. Underneath the image, the text reads "Test Women Shirt" and "\$25 \$23". There is also a logo in the bottom right corner of the product page area.

Tell everything for the product just in ONE scan

Present solutions

**With single entity QR Code
and no smart APP**

STT-Scan to Tell QR Code generator

Dashboard screenshot showing a list of items with columns for Name, Price, and Status. A red item is highlighted.

ORGANISED

Dashboard screenshot showing a QR code generator interface with a QR code and a 'Generate QR code' button.

EASY

Dashboard screenshot showing a chat interface with a list of messages and a chat window.

COMMUNICATIVE

Dashboard screenshot showing analytics and charts, including a bar chart, a line chart, and a world map.

DEEP ANALYTICS

Article / Product Qr Codes

Embed dynamically all
of the product data in a
single QR Code
Eliminating the need of
conventional website

Organised and easy
data access

The screenshot displays a software interface for managing Article QR Codes. The interface is organized into several sections:

- Sidebar:** Contains navigation options such as 'Home', 'Add New Article', 'Article QR Code', and 'QR Code management'.
- Search Bar:** Located at the top of the main content area, with a search icon and a 'Search' button.
- Form Fields:** Includes fields for 'Article name', 'Category', 'Search sub Category', 'Label', 'Article type', 'Publisher', 'Article ID', and 'User'.
- Table:** A table listing Article QR Codes with columns: 'Image', 'Name', 'QR Code', 'Total Sales', 'Article', 'Category', 'Created date', and 'Owner'. The table contains several rows of data, including items like 'T-shirt', 'Ladies summer collection', and 'New Text After the design'.
- Modal Windows:**
 - Add New Article:** A modal window for adding new articles, with fields for 'Article Name/Number', 'Name and category', and 'Article ID'.
 - QR Code management:** A modal window showing a QR code and a 'Create & Share QR Code' button.
- Background:** Shows a website with a banner for 'Shop the latest Men's Summer Shirts Collection!' and a video player.

Production QR Codes

Create the entire
production Qr Codes
with their relevant
production data

One click Traceability

The screenshot shows a web application window titled "Create Production QR code". On the left, there is a product information panel for a "Ladies summer stylish shirt" (red hoodie). The panel includes a "Discard" button and the following details:

- Article: Ladies garments collection 2023
- Category: UnCategorised / UnSubCategorised
- Vendors: N/A
- Combination: N/A
- Batch Number: N/A
- Manufacture date: 23-08-2023
- Expiry date: N/A

On the right, there are two main sections:

- Product QR code:** A large QR code with "Attribute" text below it and "Print", "Download", and "Send" buttons.
- Create production QR code:** A section with an "Enter qty" input field containing "200", a "Create production QR Code" button, and a "Duplicate QR Code" section displaying a 4x5 grid of 20 smaller QR codes.
